

The all new Luxe® bolt system is designed from the ground up to satisfy the performance expectations of any competitive player. Featuring a multi-stage core the X-Core offers a significant increase in efficiency, a reduction of maintenance and delivers the smooth shot that has defined the Luxe® series of markers. The X-Core is the largest change to the Luxe® bolt system in more than a decade - and it was worth the wait.

Inspired by professional player feedback, the Pro-Lock frame allows the player to fully remove their grip-frame without tools and utilizes an uncompromising locking system to prevent accidental removal. Once again, Luxe® sets the new standard in tool-less features. The convenience and speed of tool-less has now made the leap to trigger frame design.

The Freak XL is the latest generation of the world-renowned interchangeable bore barrel system. Custom milled and styled for the Luxe® X, it is the last barrel you will ever need. Players can utilize the Freak XL Boremaster Kit (*sold separately*) to access a wide range of bore sizes to ensure players the most consistent and accurate shot possible.

By utilizing a single mounting screw and fully sealed roller bearings, the EZ-Axis trigger system simplifies adjustment and removal of the Luxe® trigger while increasing its resistance to dirt contamination. A single allen key is all that is needed to remove, adjust or install your trigger without the need to remove the frame. One of the best feeling triggers in paintball is now the simplest and most durable.

The Opti-Breach System is designed around the interaction of the paintball, chamber and bolt face all working in symphony to minimize force. Low angle lever detents reduce pressure on the ball and offer incredibly long life. The vision system delivers excellent performance in extreme conditions and can be serviced without the need for tools. Finally, the open face bolt contacts the paintball on its strongest location, its outside edge, evenly distributing force as the ball travels within the breach.
